CLIENT UPDATE

Rips.win updates completed on March 11, 2026

Here's a polished visual recap of the completed work. The screenshots below are embedded via CDN so this file stays fully portable, and the outbound links point to the live production build.

- Clearer Stake market guidance
- Manual market switcher in the footer
- Homepage bonuses now visible
- Full-card clickable bonus cards
- Clips updated to the new videos
- Shorts + standard videos display correctly

Requested updates

REQUEST 1

Clarify market guidance and move it into the footer

Simplify the Stake.us vs. Stake.com messaging, make it less intrusive, and allow visitors to switch manually if the default looks wrong.

REQUEST 2

Add the real bonuses to the homepage

Show the same shared bonus cards used on `/bonuses` and make the full card clickable instead of only the button.

REQUEST 3

Refresh the clips section with the new videos

Replace the old clips, support both Shorts and standard YouTube formats correctly, and keep the carousel visually consistent.

Homepage overview

This full-page capture shows how the updated homepage now flows after the requested changes were applied.

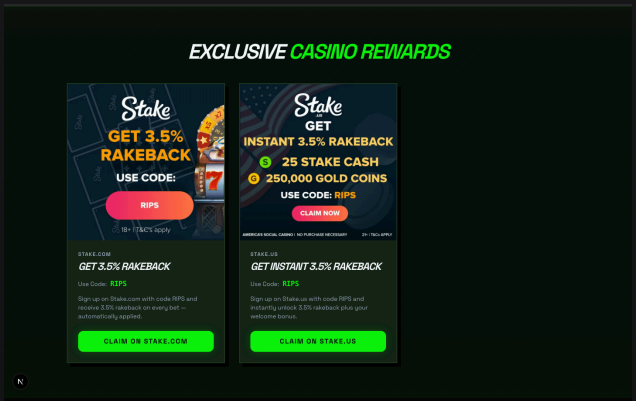
Bonuses added to the homepage

- Added the live bonus cards directly to the homepage.
- Matched homepage bonuses to the shared `/bonuses` content and cards.
- Made each full bonus card clickable for a cleaner experience.

Open production bonuses page



Clips section refreshed

- Replaced the previous clips with the two new YouTube videos provided.
- Shorts now display in portrait while standard YouTube videos display in landscape.
- The carousel still keeps a consistent visual height.

Open production clips section

Footer market guidance update

- Moved the market guidance into the footer for a less intrusive layout.
- Reworded the copy to better explain United States vs. international link choice.
- Added a simple market switcher so visitors can override the default if needed.
